

# POWER UNDER CONTROL

## Allenair's Cyl-Check<sup>®</sup>

The Allenair Cyl-Check<sup>®</sup> is a self-contained oil filled unit which can be used in any tool or work feeding application, eliminating chatter caused by variations in power thrust and irregular loads, providing smooth, uniform and precise feed control. The unit can be coupled with a Pneumatic Cylinder or other linear motion devices and provides the flexibility required in many applications, without the costly expense of a completely hydraulic system. The Allenair Cyl-Check<sup>®</sup> is a high quality unit carefully designed, produced, assembled, and tested to provide long trouble-free service.

### Characteristics

- ◇ Infinitely variable, easily adjustable speed rate in forward, reverse or both directions, Controlled speeds for 1" to 600" per minute.
- ◇ 3,000 lb. maximum thrust load capacity.
- ◇ Optional stop and skip-check features.
- ◇ Eliminates costly hydraulic systems.

We give personal care to all standard orders as well as special engineering requirements and designs.
